

Terrarium Fun!

What you need:

- 1 Glass Jar
- 1 succulent
- Small stones
- Moss
- Soil
- Any decorations you want to add!

Step 1:

Firstly you need to select a glass jar for your plant to go in. Any size is okay but a card with a larger opening will be better as it is easier to fill and decorate.

Step 2:

Collect all the natural bits and pieces you will need for this project, you will probably be able to find these things in your garden or on a nature walk, but remember to be mindful of social distancing!

Step 3:

Fill the bottom of your jar with small stones so that the base of your jar is covered.

Step 4:

Next cover the layer of stones with a thick layer of moss. Both these layers will help with drainage when you water your plant!

Step 5:

After this, add soil leaving a pocket at the top for your plant to fit inside.

Step 6:

Carefully put your succulent into the soil and secure it.

Step 7:

Decorate your new plant friend however you like!! And don't forget to give it a little water!
